(54) ANTIFOULING PAINT COMPOSITION, PAINT FILM OBTAINED FROM THE COMPOSITION, VESSEL OR UNDERWATER STRUCTURE COATED WITH PAINT FILM, AND ANTIFOULING METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an antifouling paint composition having excellent storage stability wherein the hydrolysis rate of a paint film obtained from the composition is well controlled, and the paint film having an excellent antifouling performance (antifouling activity) especially, the excellent antifouling performance under an easy fouled environment over a long time can be obtained.

SOLUTION: The antifouling paint composition comprises (A) a silyl ester copolymer containing the component unit derived from a polymerizable unsaturated carboxylic acid silyl ester, and (B) agathic dicarboxylic acid, an agathic dicarboxylic acid derivative, a metallic salt of agathic dicarboxylic acid or a resin acid component containing thereof as the main component.
